AECI: Chemical Operations Learnerships 2026 Apply Here

Description

Join AECI Mining's Chemical Operations Learnership program, an opportunity to gain practical experience and expertise in the chemical manufacturing industry. This comprehensive initiative provides a platform to develop fundamental skills while contributing to the production of quality chemical products.

Responsibilities

- Engage in theoretical and practical training sessions focusing on chemical processes, safety protocols, and manufacturing operations.
- Assist in various stages of chemical production, including mixing, blending, and quality control procedures under supervision.
- Comply with safety regulations and protocols while adhering to standard operating procedures.
- Collaborate with experienced professionals to understand and apply chemical manufacturing techniques effectively.
- Maintain a clean and organized workspace while ensuring equipment functionality.

Qualifications

- Minimum educational qualification: Matric/Grade 12 or equivalent with Mathematics and Science.
- Enthusiasm for the chemical manufacturing industry and a desire to learn and grow within the field.
- Strong attention to detail and willingness to follow safety procedures meticulously.
- Effective communication skills and the ability to work well within a team.
- Commitment to learning and applying new skills in a practical setting.

Job Benefits

- Hands-on training and experience in chemical operations within a reputable organization.
- Mentorship from industry experts, providing insights into chemical manufacturing processes.
- Potential for growth and career advancement within the company based on performance and completion of the learnership.
- Exposure to various aspects of the chemical manufacturing industry, providing a strong foundation for a career in this field.
